Aditya **Raj**

Developer

About me

Hello my name is aditya raj.I'm from Hamirpur. I'm 20 years old. I'm a developer with experience in Python, WordPress, JAVA ,C ,C++ ,HTML, javascript , CSS and i have made some websites for small and medium sized businesses.
I am a expert in Python programming and Machine Learning and Artificial Intelligence with Python. I am also good at front and back end both.'

personal

Name–Aditya Raj
Age–20
nationality–Indian
Contact Number–8299362893
Email–ar8342077@gmail.com

Areas of specialization

Python • Machine Learning • WordPress
HTML/CSS • Javascript

Hobby

Animal Keeping
Coding
Reading
Listening Music

ABOUT ME

I'm a developer with experience in Python, WordPress, JAVA ,C ,C++ ,HTML, javascript , CSS and in building websites for small and medium sized businesses. I am a expert in Python programming and Machine Learning and Artificial Intelligence with Python....

QUALIFICATION

B.com	**Government Model collage** 2019 · 2022 🏛	
ADCA	**Sanskar Institute Of Technology** 2016 · 2017 🏛	
CCC	**Sanskar Institute Of Technology** 2021 · 🏛	
O Level	**Sanskar Institute Of Technology** 2020 · 2022 🏛	

PROGRAMMING

html, css
LATEX
python
R
javascript
C

EXPERIENCE

July–November2021	**Python Developer** INTERNSHIP · 📍 Shape AI
2012–2022	**Freelance Developer** · 📍
2022	**Campus Leader** INTERNSHIP · TechLearn 📍

CERTIFICATES

2021	Python Certificate from Perfect Elearning
2021	Data Structures in Python from Perfect Elearning
2022	Machine Learning in Python from Perfect Elearning
2022	Resume Building from Perfect Elearning

December 13 2021	*Python*,From GUVI
April 25 2021	Build a Face Recognition Application Using Python As Part Of AI For India Event
June 6 2021	*Advance Excel*, From JS Academy
2022	*Object Oriented Programming*, From Perfect Elearnig
2022	*JAVA*, From LM Institute

PROJECTS

Machine Learning Project	*Chest Cancer Prediction using Logistic Regression*, **PERFECT E LEARNING..**
	Wrote a python script to detect the type of a cancer from the given data. From this detect whether the patient is in the malignant or benign stage.It is based on the vised learning algorithm called linear regression by converting the given data into classification. In this project developed a mechanism to test the trained data v present data to detect the type of cancer
Machine Learning Project	*Spam Mail Classification using SVM*, **PERFECT E LEARNING..**
	Using machine learning designed a model which classif the span mail and ham ma support vector machine algorithm.
Machine Learning Project	*Covid Cases Prediction using Redression*, **PERFECT E LEARNING..**
	Using Machine learning designed a model which gave a prediction of covid cases based regression, taking various parameters like number of current cases. conta Zones etc.
Python Project	*Guess Game using Python*, **PERFECT E LEARNING..**
	In this game, there is a list of words present, out of which the interpreter will cl random word. The user first has to input their names and then will be asked to gu alphabet. If the random word contains that alphabet, it will be shown as the outp correct placement) else the program will ask you to guess another another alpha
Python Project	*A Chat Bot Like Swiggy*,**Tech Learn**
	It is a machine learning model that takes several signals as input to define the frau ment of all customers. This was integrated into the chat bot, to talk more infor personalized decisions.The resualts are very promising
